

Capture-the-Flag : an introduction

Muiz Kadir

5/11/2022

What is a Capture-the-Flag(CTF) Competition

Information Security Capture the flag (CTF) Competition

Alternative & Fun ways to learn Cybersecurity

Team-based or Individuals competition attract a diverse range of participants, including students, enthusiasts and professionals.

Aimed at helping in capacity development in the fields of Cybersecurity especially during this Post-Covid Era.

Highlights real cyber security concepts, real vulnerabilities, real techniques etc.

CYBERBATTLE; CTF in Brunei

Why participate in CTFs

IT SECURITY ANALYST

Responsibilities:

- Perform vulnerability assessment for our clients and produce the relevant reports in a timely manner.
- Assist Senior IT Security Analyst to manage assessment projects
- Keep up with the latest security and technology developments
- Research/evaluate cyber security threats and manage them
- Evaluate cyber security related products and services
- Conduct training/talks on IT Security related matters
- Provide subject matter expert assistance to relevant teams within the organization
- Assist with creation, updating and delivery of cyber security awareness training and materials
- Mentor Junior IT Security Analyst

Requirements:

- Professional qualification/certifications would be an advantage
- Minimum 3 years working experience in I.T. or any experience related to I.T. security auditing would be an advantage
- Previous participation in Capture The Flag (CTF) or similar competitions would be preferred
- Experience in mobile/cellular communication protocols would be an advantage i.e. SS7 technologies
- Experience in mobile application development (Android or iOS) would be an advantage
- Experience in Internet of Things (IoT) would be advantage
- Strong interpersonal leadership and communication skills

Types of CTFs

Web	Crypto	Forensics	Reverse	Misc
1	165	100	50	50
150	150	150	100	100
204	150	150	150	165
203	200	200	200	150

Flag Format

Flag{iamtheflag}

This is where you'd put the answer, i think...

CBCTF{Pr0Gr355N0tP3rF3C710N}

General Rules

- Do not attack other player's workstation/laptop.
- Do not share flag (answers) with other contestants during competition.
- Do not attack Score Server i.e. Denial of Service , Bruteforcing challenges.

* different CTF organizers have different set of rules

Web

Digital Forensics

Cryptography

Programming

What is Cryptography

-- --- .- -.-. --- -.. . = morsecode

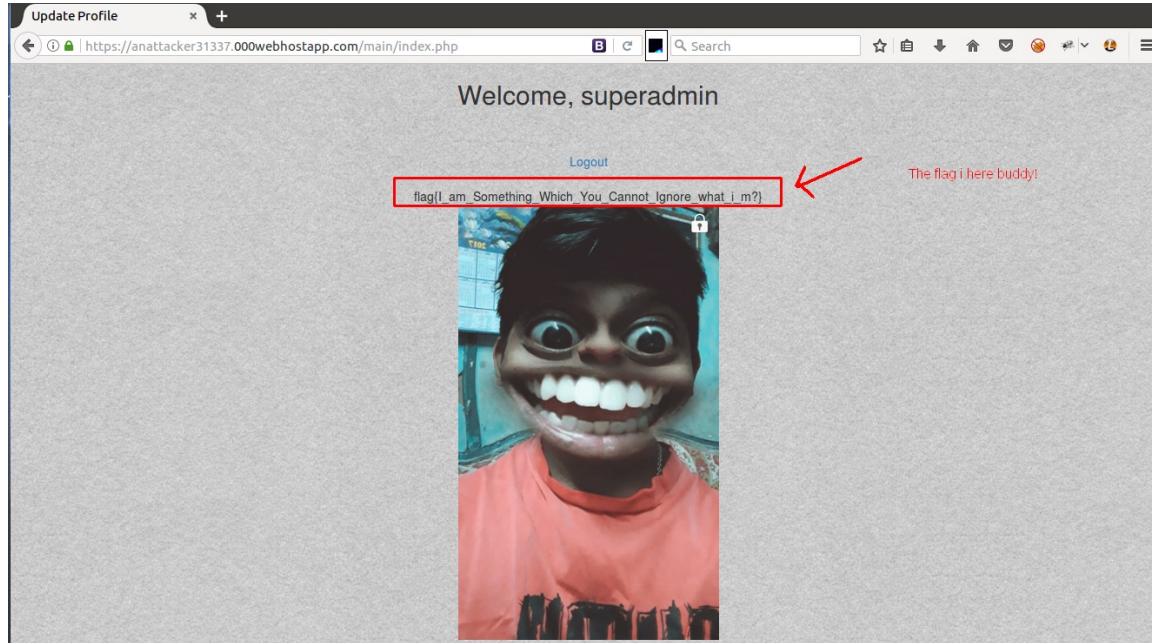

- Involves “breaking” or reversing encryption, ciphers or encoding
- Can either be really simple reversing base64 or something that needs some coding/scripting and deep understanding of encryption algorithms
- Few examples: XOR, Caesar’s Cipher, Substitution Cipher, Vigenere Cipher, Hashing Functions(MD5, SHA256), Block Ciphers, Stream Ciphers, RSA, Base64, Base32
- Tools of the trade: Cyberchef, dcode.fr, python or any scripting languages

What is Digital Forensics

- Involves file format analysis, steganography, memory dump analysis, or analyzing metadata
- Varies from real life scenarios and game like challenges
- Any challenge to examine and process a hidden piece of information out of static data files
- Tools of the trade: autopsy, binwalk, pic2map(for location of photo), volatility, stegsolve, steghide and many more
- For this CTF we're focusing on using things we can google, online tools

```

What is Web

- Involves interpreting, finding vulnerabilities and exploiting a web application
- By exploiting the web application it will reveal the flag
- Common vulnerabilities include, SQL Injection, SSRF, XSS, Cookie Tampering, and others on the OWASP Top 10
- Tools of the Trade: Burp Suite, browser's built in web developer tools, BeeF, SQLMap
- FOR THIS CTF WE'RE ONLY USING BROWSER'S BUILT IN WEB DEVELOPER TOOLS

What is Programming

The image shows a screenshot of a Python 3.8.5 Shell window. The window has a title bar that says "Python 3.8.5 Shell" and standard window controls (minimize, maximize, close). Below the title bar is a menu bar with options: File, Edit, Shell, Debug, Options, Window, and Help. The main area of the window is a text editor with a light gray background. It contains the following text: "Type 'help', 'copyright', 'credits' or 'license()' for more information." followed by a prompt ">>>" and the command "print('Hello, World!')". The output "Hello, World!" is displayed below the command. The prompt ">>>" is followed by a vertical cursor. At the bottom right of the window, the status bar shows "Ln: 5 Col: 4".

```
Python 3.8.5 Shell
File Edit Shell Debug Options Window Help
Type "help", "copyright", "credits" or "license()" for more information.
>>> print('Hello, World!')
Hello, World!
>>> |
```

Ln: 5 Col: 4

How to register yourself

- Go to <http://isb.cyberbattlefinals.xyz>
- Then click on register or click here button.
Fill in all form and click submit
- FYI, You can pick any pseudonym u want.
As long as it does not contain any vulgar words.

User Name

Your username on the site

Email

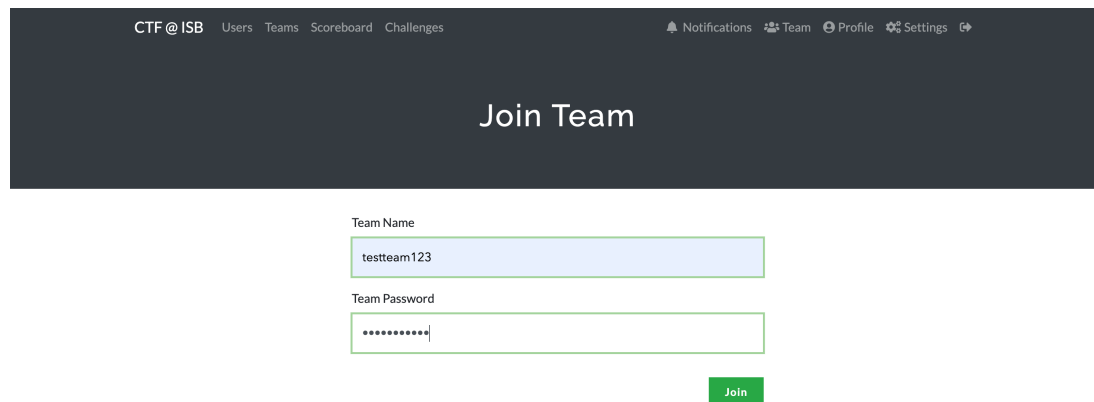

Never shown to the public

Password

Password used to log into your account

How to create teams

- Only one person in the team will need to do this
- Click the "Create teams" button
- Fill in the details, make sure the password is easily sharable with your teammates

The screenshot shows the 'Join Team' page of the CTF@ISB application. The page has a dark header with navigation links: CTF@ISB, Users, Teams, Scoreboard, Challenges, Notifications, Team, Profile, Settings, and a help icon. The main heading is 'Join Team'. Below it, there are two input fields: 'Team Name' with the value 'testteam123' and 'Team Password' with masked characters. A green 'Join' button is at the bottom right.
